California: The Crossing Over State from the 50 Prayer Focus

Dutch Sheets prophesied “Tell California it’s time to cross over! I’ve brought this state to a place; I’ve accomplished some things by My Spirit; the potential is there for you. Every generation must have its crossing over. You must choose! It’s your turn to take this state across.”

In the Old Testament, crossing over is when we align or realign with God and his purposes. The word is “Abar” meaning to cross over or penetrate. It can denote very significant crossings as did Abraham, Moses, and, Joshua. We as a nation must cross over to align with our Heavenly Father. To achieve spiritual recovery and restoration we must humble ourselves, pray and seek God’s face, and repent. God is realigning and positioning America to cross over into a New Era of Revival and Blessing.

Chuck Pierce prophesied, “War is in your midst – it will be known that war is in California. Though this state has been passive towards My Purpose in the past, it will be known that God’s Warriors have Risen in California.”

Our Prayer Focus this week for both California and America:

1. We must contend for California to cross over as a forerunner for America.
2. The Spirit of Lawlessness must be broken, and a return to Law and Order reestablished.

3. A Revival to change hearts and minds as Mario Murillo has been experiencing. Thousands are running to the altar to be saved, drugs surrendered, walking away from Gangs, etc.

4. The stronghold of the Tech Companies must be neutralized so they can no longer censure the truth.

5. Restoration of the Bill of Rights for all Californians including no Sanctuary Cities or Cashless Bail.

6. Governor Newsom has already passed a law to become the Abortion State for America in anticipation of Roe vs. Wade being repealed.

Key Facts for California: State Capitol in Sacramento. Nickname: The Golden State

1. California is the birthplace of the internet and home to Silicon Valley (a region known the world over for high technology, innovation, and venture capital.)

2. The High-Tech Giants, Apple, Google, and Facebook have consistently black-listed and censored conservative Americans. As a result, it has caused many ministries and conservatives to move to Rumble and other media options.

3. On average, California experiences over 100,000 earthquakes a year.

Fortunately, many of these earthquakes are quite feeble.

4. California has the largest Homeless Population in America. It has led to rampant homeless camps and unsafe areas.

5. Because of Soros-backed DA's they are no longer arresting anyone guilty of theft under \$950. They also have cashless Bail which puts offenders back on the street within a day. It's gotten so bad that residents in many areas are leaving their cars unlocked, trunks up, etc. to prevent car damage from smash and grab gangs.

6. These liberal policies have led to unprecedented daytime thefts and looting, driving many retailers to close.

7. After the 2020 Census, California lost a congressional seat for the first time.

8. Residents are fleeing to Nevada, Arizona, Texas, and Tennessee.

9. They have the most restrictive Covid regulations in America.

10. California tops the list of the most racial and ethnic diversity & Fresno being among the top ten makes it to the list due to over 100 different nationalities that reside in the city.
