

New Hampshire

New Hampshire: (Granite State)

Motto: Live Free or Die

The State of Freedom

Chuck Pierce said that the word of the Lord to New Hampshire is that their worship will be a prototype of how the nation goes. The atmosphere created will cause a shift of turning our nation back to God. The army of God in the nation will gather strategy from this state for the battle.

New Hampshire was the first state to sign the Declaration of Independence. It will be the first state to restore a full covenant with God that will bring the nation back to liberty and freedom again. New Hampshire will bring a voice of the uncompromising truth politically and spiritually--a voice that will cause the enemy to know that he will not be able to divert the plan of God. There is a peculiar anointing for breakthroughs in this state and it will become a refuge for many nations.

Dutch Sheets said that the people of New Hampshire are giant killers. They have persistence, tenacity, and a holy stubbornness. They are a hammer state. Their prayers and worship bring an anointing like a hammer that strikes blow after blow to bring breakthrough. They must take the arrow of the Lord and strike hard! New Hampshire is a gate state that reflects the authority of gatekeepers. They have a governmental authority to lock and unlock, to bind and to loose. They will have an atmosphere to overthrow the thrones of iniquity and bring freedom to the covenant of God. They will produce a new sound from Heaven, and God will use them to rearrange the nation. Their fore-fathers built New Hampshire on the verse from Isaiah 33:22. New Hampshire is about to experience a spiritual unity and alignment unlike anything we have ever seen.

New Hampshire (Named after Hampshire County, England). Hampshire. New Hampshire, you are a first fruits state. Take your place, New Hampshire, and sit down and rule with God. We ask that You align New Hampshire in Your righteousness.

June 21, 2021 I was contemplating Holy Spirit's move in this new era with His angel armies and the remnant now forming New Hampshire: "Live free or die." We declare the purpose and plans for this new era.

Prayer Focus:

That this State's Remnant would pray and worship to open up a gate as prophesied to overthrow thrones of iniquity and bring freedom to god's covenant people.

New Hampshire as an Independence minded state is divided politically. Governor Sununo is a Republican but both Senators are Democrat. One is up for re-election. Maggie Hassan is very supportive of the Democratic policies and has voted for all liberal bills sent through congress and the Senate. She must be defeated to turn the Senate and bring the thrones of iniquity down over America.

Pray that their Doorway Program for Mental Health will continue to have great success. Over the last two years, they've reduced drug overdose deaths by more than 10% -while the national statistics have risen 50%

They like all states are battling a housing affordability issue along with inflation and affordability across all segments of their residents

Their legislature is developing an Educational Freedom program to give all citizens the right to choose schools for their children.

They are also developing a Family Leave Act.

New Hampshire: Capital is Concord

In January of 1776, six months before the Declaration of Independence New Hampshire declared its independence. It has remained a state of men and women of independent spirit. For that reason, as an independent mindset it is one of the first presidential primaries.

Some of the accomplishments of Governor Sununo and their divided state legislative branch accomplished several key initiatives over the past year include:

The Granite State is ranked as the Freest State in the Nation

- They have the Strongest economy and the fastest population growth in the northeast
- They are Number One in America for Public Safety and Crime
- First in Economic Freedom
- Continue to have Lowest Poverty Rate in in the country with some of the highest average wages for our citizens.
- They kept businesses and schools open during the pandemic
- They stopped the federal vaccine mandates and let individuals, businesses, and communities decide what worked best of them

Over 50% of the state is covered with forests. They were one of the first states to develop workshops, factories and mills. They had the largest textile mill in the world. Their resources include lumber, maple syrup, mica, granite and stone, along with electrical equipment and machinery. Their stone has been used in the Library of Congress and many other public buildings in D.C. and America.
